*Fill in the value scales as shown.*

Use the **Step Value Scale** on forms with flat sides such as cubes, prisms & pyramids.

Use the **Gradation Value Scale** on forms with curved surfaces such as spheres, cylinders & cones.

A **Crosshatching Value Scale** is useful when you are working with pen or marker. It can be done in either gradation or steps.

*Use the stippling technique to make the right look like the sphere on the left.*

*Stippling (dots)*

*The closer the dots, the darker you get*

*The farther apart the lighter*
